

ITS Technicians

WebXtender 16.3 requires the two files shown below to be installed on the computer used for scanning.

Unzip and run the setup for the toolkit first and once completed do the same for the runtime.

The screenshot shows a Windows File Explorer window with the following path: Network > smccd.net > NAS > Software > PC Files > Banner Software > WebXtender. The window displays a list of files with the following columns: Name, Date modified, Type, and Size.

Name	Date modified	Type	Size
captiva_cloud_runtime_3.0.989.zip	1/28/2019 5:12 PM	WinRAR ZIP archive	25,791 KB
captiva_cloud_toolkit_3.0.zip	6/1/2018 7:48 AM	WinRAR ZIP archive	105,074 KB
